SKILLS

- **Languages:** C++, Java, JavaScript, C, PHP, Python
- **Frameworks:** HTML and CSS, NodeJS, React JS, Next JS
- **Tools/Platforms:** MySQL, MongoDB
- **Soft Skills:** Problem-Solving, Team Player, Adaptability

PROJECTS

- **Horticultural Crops Web Solution | HTML, CSS, JavaScript, PHP | [GitHub](#)** Apr'25
 - Developed a full-stack horticultural e-commerce platform providing crop-specific market data, optimal storage tips, and critical price insights for farmers and consumers.
 - Built interactive category pages for various produce (fruits, vegetables, herbs, spices, nuts), integrating advanced search functionality and a dedicated chatbot for user support.
 - Implemented a robust transactional backend including secure shopping cart functionality, a comprehensive checkout system, and a database for managing user orders and real-time price changes.
 - Optimized front-end load times and asset delivery, ensuring a responsive user experience and reliable performance even under varying network conditions.
- **Research Collaborator Web Platform | HTML, CSS, JavaScript, REST API | [GitHub](#)** Mar'25
 - Constructed a dynamic web application utilizing REST APIs to fetch, display, and manage real-time data, improving user interaction and application responsiveness.
 - Created a responsive web platform that enables students and researchers to share project ideas, topics, and resources through an intuitive HTML/CSS interface.
 - Orchestrated REST APIs to fetch, update, and manage real-time research data, ensuring smooth communication between users and the server.
 - Augmented dynamic JavaScript features such as search, filtering, and interactive content updates to enhance user engagement and collaboration.

TRAINING

- **Basics of Data Structures and Algorithms | [Certificate](#)** Jul'25
 - Strong understanding of basic data structures and algorithms, including arrays, stacks, queues, and sorting techniques, with the ability to analyze time and space complexity for efficient problem-solving.
 - Understanding of fundamental data structures and algorithms with hands-on practice in implementing efficient logic to solve basic computational problems.
 - Basic proficiency in applying data structures and algorithms to write optimized code and improve overall program performance.
 - Familiar with core algorithmic concepts such as recursion, searching, and sorting, and their practical use in solving real-world programming problems.

CERTIFICATES

- The Bits and Bytes of Computer Networking from Google | [Certificate](#) Dec'24
- Specialization in Computer Communication, University of Colorado | Coursera | [Certificate](#) Sep'24
- Data Structures and Algorithm | Neo-Colab | [Certificate](#) Jan'24
- Legacy Responsive Web Design V8 | FreeCodeCamp | [Certificate](#) Aug'23

ACHIEVEMENTS

- **Secured Top 18 in Hackathon | [Certificate](#)** Mar'24
Secured a Top 18 rank among 50+ teams at the Code Off Duty Web Hackathon for building an innovative web application, demonstrating strong skills in web development, problem-solving, and teamwork.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 6.29 August 2023
- **Sri Chaitanya Jr College** Rajahmundry, Andhra Pradesh
Intermediate; Percentage: 80 April 2021 - March 2023
- **Sri Chaitanya E.M High School** Rajahmundry, Andhra Pradesh
Matriculation; Percentage: 100 April 2020 - March 2021
